

.NET Backend Developer • hsnrz2002@gmail.com • 994-50-342-18-19

Experience

Jugaad (Internship)

Jan 2023 – Jul 2023

- Developed backend features using ASP.NET Core, Entity Framework, and SQL Server
- Built RESTful APIs and used Git/GitHub for version control

Jugaad (.NET Developer)

Sep 2024 – Jun 2025

- Continued backend development using C# and ASP.NET Core, building scalable and maintainable services
- Enhanced existing C# Web APIs and implemented new features following best practices

Projects

PhotoHome-ASP.NETMVC,Cloudinary,SQLServer

A social media-style platform for photo sharing, allowing users to upload and interact with photos. Images are stored securely in the cloud using Cloudinary. The platform supports features like likes, comments, and user engagement with a focus on performance and scalability.

HelpOverty (Google Solution Challenge)

A system designed to coordinate social aid and donations, streamlining the donation process. Connects donors with those in need through an efficient and user-friendly platform, enhancing transparency and organization in charitable activities.

Experience Sharing Platform - ASP.NET Core, React, SignalR

A web application where users can share their experiences. Features include real-time messaging and a live notification system powered by SignalR. Built with a modern UI and scalable backend to support smooth, real-time communication.

Firsatto.com-Next.js,Supabase

A listing platform that allows users to post their own advertisements. Built with Next.js for a modern and responsive frontend, and Supabase as the backend to provide real-time data support and authentication. The project is designed to deliver a fast and user-friendly experience, enabling efficient management and browsing of listings.

Education

Baku Engineering University, Baku, Azerbaijan

System Engineering | GPA: 80/100 | Graduated: July 2023

Step IT Academy, Baku, Azerbaijan

Software Development Program | Apr 2021 – Feb 2025 (Expected)

Skills & Interests

Backend: ASP.NET Core (MVC, Web API), Entity Framework, Dapper, REST APIs, Python (Django, FastAPI), PHP, Next.js

Databases: SQL Server, PostgreSQL, MySQL, Redis, RabbitMQ

Cloud & DevOps: Azure, Cloudinary, Docker, CI/CD (GitHub Actions)

Other: Git, GitHub, Agile/Scrum
